Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 04 September 2002.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

This application filed June 11, 2001 is a continuation-in-part of 09/459,292 filed December 10, 1999, now US Patent 6,479,051.

Claims 1-29 are pending and currently under examination.

Election/Restriction

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 3, 5, 7, 10, 12, 14, 17, 19, 21, 25, 27 and 29, drawn to a method of improving vaginal health comprising delivering a probiotic organism wherein said organism is a *Lactobacillus*, classified in class 424, subclass 93.1.
- II. Claims 4, 6, 11, 13, 18, 20, 26 and 28, drawn to a method of improving vaginal health comprising delivering a probiotic organism wherein said organism is a *Bifidobacterium*, classified in class 424, subclass 93.1.
- III. Claim 22, drawn to a pharmaceutical composition consisting of *L. rhamnosus* GR-1 and *L. fermentum* RC-14, classified in class 435, subclass 252.1.

Claims 1, 2, 8, 9, 15, 16, 23 and 24 link inventions I and II. Upon the allowance of the linking claim(s), the restriction requirement as to the linked inventions shall be withdrawn and any claim(s) depending from or otherwise including all the limitations of the allowable linking claim(s) will be entitled to examination in the instant application. Applicant(s) are advised that if

Art Unit: 1632

any such claim(s) depending from or including all the limitations of the allowable linking claim(s) is/are presented in a continuation or divisional application, the claims of the continuation or divisional application may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Where a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are drawn to separate and distinct methods requiring different materials to practice. Though the method steps required to practice the claimed invention are broadly the same, each of the methods requires the administration of a different type of organism, wherein each would have an affect dependent on specific or inherent properties. A search of the relevant art for one organism for use in the claimed methods would not identify art for the other.

Inventions III and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the product encompassed by group III is not necessary for the practice of the method of group II.

Art Unit: 1632

Inventions III and I are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the method can be practiced with other strains of *Lactobacillus*, and the specific strains set forth in claim 22 are used in other laboratory investigation unrelated to the methods of group I.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their divergent subject matter and separate search requirement, restriction for examination purposes as indicated is proper.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
